Designing **Flavor.**

All-purpose grinders, while marketed as versatile, often perform better in either espresso or filter brewing methods. Grinders optimized for espresso can produce a muddy filter, while those designed for filter brewing may yield an under-extracted espresso with a lack of body.

Life X offers the best of both worlds.

Keeping the promise.

Clarity and body.

Life X is designed to handle a variety of brew settings, **all the way from Espresso to French Press**, thanks to the depth of its grinding chamber, combined with the variable impact burr geometry and advanced flap design, ensuring optimal particle size distribution for any brewing method.

life.X

Size Matters.

The Life X features the innovative **XB50 burrs**, manufactured by Ceado **without the use of screws**. This design allows for the performance of larger 60 mm burrs, while minimizing retention and reducing coffee waste. The grinder also boasts the highest motor power-to-burr diameter ratio, ensuring exceptional durability and consistently precise performance, while minimizing the chance of jamming.

Parallel Modes.

Setting the dose has never been simpler with the Life X thanks to the **user-friendly interface that makes it easy to switch between timed and manual dosing options**, allowing you to customize your grind mode to your preferred brewing method. The grinder kits in the box, comprising of a **bean hopper and a dosing funnel**, grant perfect workflow for both manual dosing and programmed doses.

Ø 50 blind flat burrs multi-purpose

Technical data

Voltage <i>Alimentazione</i>	110 / 220-240V · 50-60 hz
Motor <i>Motore</i>	300 W
Rpm 50hz / 60hz	1380 / 1650 rpm
Average Output (g/s)	1,6 (50hz) / 1,9 (60hz)
Net weight <i>Peso netto</i>	5,4 kg
Gross weight <i>Peso lordo</i>	6,0 kg
Dimensions	150 x 200 x 355h mm
Burrs <i>Macine</i>	XB50 Ø 50 blind flat burrs multi-purpose*
Hopper <i>Tramoggia</i>	Capacity 300 g
Funnel	Approximately 30 g
Dose setting	2 Programmable Times / Manual Dosing

Note: Additional voltage models available.

*US version uses *Steel burrs* only.
